Project

Netflix-AI | AI-Powered Movie Recommendation App

- Built a Netflix-style movie platform using React and Tailwind CSS with a fully responsive UI.
- Implemented secure authentication using Firebase (Email/Password & Google Sign-In) and protected routes with React Router.
- Integrated REST APIs to display dynamic movie categories and an auto-playing hero trailer.
- Developed an AI-based recommendation feature that converts user prompts into relevant movie results with multi-language UI support.

View Live Demo

Dev Meetup | Developer Networking Platform

- Developed a Tinder-style developer networking platform using React with a mobile-first responsive design.
- Implemented API-based authentication and access-controlled routes to secure user sessions.
- Built real-time profile browsing and connection actions (send, accept, reject) with dynamic UI updates.
- Managed global user and connection state efficiently using Redux Toolkit.

View Live Demo

I Heart Cafe | Premium Brand Website

- Designed and developed a modern personal portfolio using React and Tailwind CSS.
- Implemented dark mode functionality and global UI state management using Redux Toolkit.
- Structured clear navigation and optimized responsiveness across mobile, tablet, and desktop devices.

View Live Demo

Personal Portfolio | Frontend Developer Portfolio

- Built a premium brand website with visually rich landing pages and strong brand storytelling.
- Developed interactive features including table reservations, brand cards, and contact page with map integration.
- Integrated a Firebase-based feedback system and ensured full responsiveness across all devices.
