PROJECTS

Dev Meetup | Developer Networking Platform

- Built a responsive Tinder-style developer networking platform supporting **3+ screen sizes**.
- Developed backend APIs with Node.js & Express for secure authentication and protected routes.
- Implemented profile browsing, connection actions, and user posts with dynamic UI updates.
- Managed global state and connection workflows using Redux Toolkit.

devmeetup.web.app

Netflix-AI | AI-Powered Movie Recommendation App

- Built a Netflix-style platform using **React & Tailwind CSS**, fully responsive across mobile, tablet, and desktop devices.
- Implemented secure authentication with **Firebase (Email/Google Sign-In)** and protected routes.
- Integrated TMDB & REST APIs to display dynamic categories and stream trailers.
- Developed AI-powered recommendations by processing prompts and fetching **multiple matching movie results dynamically**.
- Improved UX using shimmer loading during async responses and **multilingual** support for accessibility.

netflix-ai.web.app

Personal Portfolio | Frontend Developer Portfolio

- Designed and developed a modern portfolio using **React & Tailwind CSS** with a fully responsive layout.
- Implemented dark mode and global UI state management to improve accessibility and user experience.
- Enhanced UI with smooth reveal animations and interactive sections.
- Built a functional contact form using **EmailJS** enabling direct message delivery.

brand.web.app

I Heart Cafe | Premium Brand Website

- Built a premium brand website with visually rich landing pages and strong brand storytelling.
- Developed interactive features including table reservations, service cards, and contact page with map integration.
- Integrated a Firebase-based feedback system for customer responses and inquiries.
- Ensured a fully responsive layout for seamless experience across devices.
